Help is available for Scottish Citizens who need it!

homeheatingadvice.scot are working in partnership with the Scottish Government to deliver the Home Heating Support Fund for Scottish households struggling with energy costs.

Who is the Home Heating Support Fund for?

The Home Heating Support Fund seeks to support vulnerable individuals and those in need, and to help communities respond to the needs and challenges they are experiencing, protecting the wellbeing of Scotland as a result.

This includes assisting Scottish citizens identified as 'self-rationing' energy.

Self-rationing of energy refers to customers deliberately limiting their energy use to spend money on other goods or services. Self-rationing affects both prepayment and credit meter customers.

Support also includes customers of **off-grid energy supplies** such as oil, gas, LPG, coal, and District Heating.

More information on the Home Heating Support Fund is available at www.homeheatingadvice.scot.

Apply online by selecting 'Household Application' or contact the advice.scot team!
